Personal Security Clearance : Valid until 12.04.2026
Driving Licence : Classes M, B, B1, D1 (No accidents since 2015)

Summary

You can find a solution to the common problem that everyone has with a computer in your room. This opportunity shaped my education and professional life. I completed my high school, associate and undergraduate education in computer science departments with top scores. I have been working for more than 3 years as a solution-oriented, collaborative software engineer at all steps in the software development lifecycle. Able to analyze and code well-researched, cost-effective, and responsive solutions. I have experience onto from small to large-scale softwares, multiple areas like highly available, auto-scalable enterprise solutions, and web applications. I took on **systems engineering** and **test engineering** tasks in parallel with my **software engineering** tasks in defense industry companies. With my requirements analysis and requirements management skills, I ensured the production of the right software that would solve people's problems. On the other hand, with my Test Engineering skills, I ensured the production of quality, useful software. With my coding skills, I automated regression tests in manual tests, reducing testing effort and human errors. I am a supportive and enthusiastic team player dedicated to streamlining processes and efficiently resolving project issues. I have a high level of personal morals and integrity. I am goal-oriented, self-motivated, and committed to the successful outcome of the project. I am willing to work hard and have a great desire to learn.

Skills

- Understands abstraction in software
- Writes easy to understand and easy to maintain code
- Knows industry standards and tries to keep up with them
- Knowledge of procedural programming, object-oriented programming, multithreading programming, solid principles, design patterns, data structure, and searching and sorting algorithms
- Knows Procedural Programming C and Object Oriented programming languages such as C++, C#, and Java and learns other programming languages from the same family in a short time
- Knows SQL commands (data manipulation commands, database manipulation commands) and transact SQL language developed for SQL server.
  Learns other SQL languages such as PostgreSQL, PLSQL, and database management systems in a short time.
- Knows Html, Css, JavaScript, Bootstrap, Php and learns other Css and JavaScript libraries in a short time
- Knows Agile methodology Scrum
- Knows CI/CD processes and DevOps tools such as Jenkins and SonarQube.
- Knows how to do Requirement Analysis and Management
- Knows how to prepare documents such as SSS, SRS, STP, STD, STR within the scope of MIL-STD, STANAG standards and HAVELSAN HVL-TEMP-SRS, MilSOFT document templates
- Knows written test concepts and techniques at ISTQB Foundation Level syllabus V4.0
- Knows how to apply static and dynamic tests in automation and manual testing in Agile environment
- Knows Testing Tools & Frameworks such as Selenium, Postman, Cucumber and learns other test frameworks in a short time
- Knows how to use Jira for problem tracking and Agile project management
- Knows how to create/update corporate memory via Confluence
- Knows Git version control system and manages Git repository with Bitbucket
- Knows Microsoft Office Programs

Languages: English (I graduated from Ankara University, which provides education in 100% English)
Turkish (native)

Work Experience

MilSOFT

Ankara, Turkey
02. 2023 – 05.2023

Senior System & Test Engineer
MilSOFT is the only company in the Turkish Defense Industry to reach the CMMI-5 level with 100% coverage in all of its projects.

Mil-DLP (MilSOFT Multi Data Link Processor) Product Line PROJECTS (Integrated with SIPER & HAKIM Projects of Aselsan Company)

Mil-DLP (MilSOFT Multi Data Link Processor) is a system that provides multi-link processing capability to share tactical information among surface, subsurface, air, and land platforms/units.

As a Senior System & Test Engineer, I have taken tasks on the on Mil-DLP Product Line which was developed by applying Agile Methodology Scrum.

Responsibilities

- Requirement Analysis and Management
- Design software and system requirements specifications
- According to NATO Requirements, the Creation of test scenarios for NATO Tactical Data Link Systems such as Link 11, Link 16, Link 22, JREAP, and VMF.
- Performing static and dynamic tests
- Creating and tracking the Problem Report record over Jira for errors, deficiencies, and improvements found during static and dynamic testing
- Creating/updating corporate memory via Confluence

HAVELSAN

HAVELSAN is a Defense Industry Company (#99 on the 2020 top list of DefenseNews) mainly focused on large-scale software projects.

Ankara, Turkey

Senior Software Engineer of Havelsan Company *10.2022-02.2023*

Dijital Twin Project

To talk about the project without exceeding the confidentiality rule, I worked as a Senior Software Engineer at all steps in the Software Development Lifecycle in Digital Twin Project at HAVELSAN.

Ankara, Turkey

Senior Software - System & Test Engineer of Subcontractor Company *04.2021–08.2022*

Ministry of National Defense Information System (MBS) Modernizasyion (MBSM) Project

The fast and effective realization of the business processes carried out within the MSB in the electronic environment, To ensure the continuity of the system against the unavailability of services as a result of an unexpected technical failure, disaster, or attack (nuclear, biological, chemical, physical, cyber attacks, etc.) in the operating information systems, prevent system interruption and loss of information, It is an information system developed using the product infrastructure named KOVAN by HAVELSAN company to ensure that relevant stakeholders can exchange data securely with MBSM within the framework of specified authorities.

As a Senior Software - System & Test Engineer, I have taken tasks at all steps in the Software Development Lifecycle the MBSM project, which was developed by applying Agile Methodology Scrum with Microservice Architecture. During the analysis and requirements determination phase, I was involved in the creation and management of the requirement set, consisting of approximately 500 software requirements for each of the 5 Departments. I also participated in software development, testing, and leadership activities (including planning and tracking of test activities in Sprint, writing test scenarios, running tests, bug tracking, and covering end-to-end processes from requirement analysis to maintenance).

Responsibilities

- Determining the requirements of the software, analyzing and reporting which are According to MIL-STD-408 software development standard and HAVELSAN document template standard HVL-TEMP-SRS
- Identifying conflicting, faulty requirements, clarifying, avoiding faulty development costs
- Reporting Engineering Change Requests (Reporting customer requests, which should be qualified as Contract Amendment Proposal, as 'SDÖ')
- Developing the application according to the identified requirements
- Planning the test based on the defined requirements, designing the test case, and creating the test procedure document
- Release of approved Test procedures on Jira
- Performing static and dynamic tests in Agile environment
- Creating and tracking the NCR record over Jira for errors, deficiencies, improvements found during static and dynamic testing
- Solving NCR 's that are in proposed status on Jira
- Following up the CD 'Continuous Delivery' process with Jenkins
- Performing regression testing and updating the status of the error record (NCR)
- When an intermediate product available to the user occurs, explain the use of the program to the user
- Preparation of the User Manual of the Modules that have been accepted provisionally/conditionally
- Explaining the use of the program to the user
- Creating/updating corporate memory via Confluence

MINISTRY OF NATIONAL EDUCATION

Ankara, Turkey

Information Communication Technology Teacher *09. 2019 - 01.2021*

4006– TUBITAK Science Fair Projects

Children starting coding education at an early age; show more development in mental development, problem-solving skills, planning of work, establishing relationships between situations, and generating new ideas.

With 4006-TUBITAK Science Fair Projects, the mental development of Vehbi Dincerler Secondary School students makes them more successful in coding in the years ahead. Considering that secondary school students will be more beneficial individuals in the state of the Republic of Turkey with these known benefits, I worked as an IT and Technology teacher and TUBITAK 4006 project manager until my job applications for defense industry companies were concluded.

Education

Gazi University — *Ankara, Turkey*

M.Sc. Information System(in English) — *2022–Currently*

- ✓ Blockchain

Ankara University — *Ankara, Turkey*

B.E.N.G. Computer Engineering(in %100 English), GPA: 3.01 / 4.00 — *2014 - 2019*

- ✓ 100 % English Education
- ✓ Programming Languages Concepts
- ✓ Object Oriented Design
- ✓ Data Structures
- ✓ Design Patterns
- ✓ Parallel Programming
- ✓ Agile Software Development | CI / CD | Jira | Confluence | Jenkins | Docker | Maven
- ✓ Embedded Programming
- ✓ Hardware Description Language (VHDL)
- ✓ Relational Databases
- ✓ Data Mining
- ✓ MSSQL Server
- ✓ C++
- ✓ Core Java
- ✓ Java Swing
- ✓ Hibernate

Gazi University — *Ankara, Turkey*

F.D.Computer Programming, GPA: 3.25 / 4.00 — *2011–2013*

- ✓ Top Score of the Faculty
- ✓ Requirement Analysis
- ✓ Requirement Management
- ✓ System Design
- ✓ Doors
- ✓ UML
- ✓ Software Testing
- ✓ Software Development
- ✓ Adobe Products (Photoshop, Illustrator)

Yenikent Ahmet Çiçek Anatolian Technical High School — *Ankara, Turkey*

Web Techonologies and Software, GPA: 79 / 100 — *2007–2011*

- ✓ Top Score of the Department
- ✓ Html | Css | JavaScript | Bootstrap
- ✓ Web Development
- ✓ Object Oriented Programming (OOP)
- ✓ SOLID Principle
- ✓ C#
- ✓ SQL
- ✓ Git Version Control System
- ✓ Github Repo System
- ✓ asp.net mvc
- ✓ Windows Presentation Foundation (WPF)
- ✓ CATIA
- ✓ Autocad 2D

Certificates

Amazon Web Services (AWS), by Özgür ÖZTÜRK	*Udemy*
Docker From Beginner to Advanced, by Özgür ÖZTÜRK	*Udemy*
Linux Commands and Shell Scripting, by Çiğdem Kadakoğlu	*Udemy*
Object – Oriented Data Structures in C++, by Wade Fagen Ulmschneider	*Coursera*
Jenkins	*BtkAkademi*
API Testing	*BtkAkademi*
Automation Testing, by Erdem Yıldırım	*BtkAkademi*

Hobbies and Interests

- Trekking
- Online Computer Games (I play in a support position in Lol game.)
- I don't smoke. At the same time, I am a volunteer member of Yeşilay
- I am a Volunteer Member of the Disaster and Emergency Management Presidency (AFAD) to raise awareness about the reality of earthquakes, which should always be aware of, and to survive in possible earthquake situations, to sustain my life, and to bring light to those who are under the collapse (under the darkness).
- I am a member of the Ankara Club Association, which was established with the directives of Mustafa Kemal ATATÜRK and keeps the tradition of being a spy.
