FERHAT TUFEKCI

Computer Engineer | Expert in Requirements Engineering | Agile Software Development & Testing Specialist | Driving Quality & Efficiency in Software Projects

The opportunity to solve a common problem experienced by everyone with a computer in your room shaped my education and business life. **I have completed** my high school, associate, and undergraduate education in **computer science programs with outstanding grades**. **Since my high school education**, **I have gained experience** by working **in different roles** such as **software engineer**, **system engineer (business analyst)**, and **test engineer** in a solution-oriented, collaborative manner **in all steps of the Software Development Lifecycle (SDLC)**. I have experience in many areas, from small-scale to large-scale software, such as high availability, auto-scalable enterprise solutions, and web applications. I am a supportive and enthusiastic **team player** dedicated to streamlining processes and efficiently resolving project issues. I have a high level of personal morals and integrity. I am **goal-oriented**, **self-motivated**, and **committed to the successful outcome of the project**.

Languages: Turkish (Native) | English (Graduated from Ankara University, which provides education in 100% English)
Personal Security Clearance: Valid until 12.04.2026
Military Service: Completed
Driving Licence: Classes M, B, B1, D1 (No traffic fines or accidents since 2015)

TECHNICAL SKILLS

Committed to staying updated with industry standards.

Requirements Analysis and Management

- Strong competency in requirements analysis and management processes.
- Competent in preparing SSS, SRS, STP, STD, STR, and User Manual documents in accordance with MIL-STD, STANAG standards, and HAVELSAN HVL-TEMP-SRS, MilSOFT document templates.
- Experienced in managing projects using the Agile methodology Scrum; skilled in utilizing tools like Jira, Confluence, MS Project, Figma, and Doors.

Software Development

- Proficient in writing clear and maintainable code.
- Experienced in procedural programming, object-oriented programming (OOP), multithreading, SOLID principles, design patterns, data structures, and searching/sorting algorithms.
- Familiar with SVN, Git (Git Version Control System), GitHub, GitHub Actions, Bitbucket, Maven, Jenkins, and SonarQube for version control processes.
- Experienced in container-based application development using Docker.
- Capable of developing user-friendly web interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Experienced in SQL, Transact-SQL (T-SQL), Microsoft SQL Server, and PostgreSQL for database design and management.
- Proficient in C++, Python, and Java (Swing, JavaFX, Spring Framework, JUnit, Hibernate) for application development.

Testing Processes

- Experienced in applying the base practices recommended by ISTQB in both automation and manual testing in an Agile environment.
- Proficient with testing automation tools such as Selenium, Postman, and Cucumber.

EDUCATION

Miuul 05.2023 - 11.2023

Data Science & Machine Learning Bootcamp Participant

It is an online-live and mentor-supported Data Scientist and Artificial Intelligence (AI) Engineer Training program.
In this program, I developed projects that solved more than 10 real-life problems and shared them on my GitHub account.

Gazi University 2022 - Present

M.Sc. Information System(in English)

Ankara University 2014 - 2019

B.E.N.G.Computer Engineer(in %100 English), GPA: 3.01 / 4.00

Since none of the courses I took in the computer programming department were not counted, my education period; English preparation (1 year) + 4 years (engineering education period).

Gazi University 2011 - 2013

F.D.Computer Programming, GPA: 3.25 / 4.00

Top Score of the Department

Ahmet Cicek Anatolian Technical High School 2007 - 2011

Web Technologies and Software, GPA: 79 / 100

Top Score of the Department

WORK EXPERIENCE

FREELANCE 06.2010 - 04.2021 & 05.2023 - Present

Full Stack Developer & Requirement Engineer & Agile Tester & Blogger

- With my requirements analysis and requirements management skills, I ensure the production of the right software that would solve people's problems.
- With my Test Engineering skills, I ensure the production of quality, useful software.
- With my coding skills, I develop the software according to the requirements. I also automate regression tests in manual tests, reducing testing effort and human errors.
- I share my experiences on my medium page. Almost all of my articles were published on pages followed by thousands of people with an approval process.

MilSOFT 02.2023 - 05.2023

Senior System & Test Engineer

MilSOFT is the only company in the **Turkish Defense Industry** to reach the **CMMI-5** level with 100% coverage in all of its projects.
Mil-DLP (MilSOFT Multi Data Link Processor) is a system that provides multi-link processing capability to share tactical information among surface, subsurface, air, and land platforms/units.
As a Senior System & Test Engineer, I have taken tasks on the on Mil-DLP Product Line (integrated with **siper** & **hakim** projects of **aselsan** company) which was developed by applying Agile Methodology Scrum.

- Organizational memory was created with the information acquired during the orientation, and the contribution time of those who joined the project later was shortened.
- According to **NATO Requirements**, the Creation of test scenarios for NATO Tactical Data Link Systems such as Link 11, Link 16, Link 22, JREAP, and VMF.
- Manual and automation tests were performed.
- Planned and monitored testing activities in the Sprint.
- Test scenarios were written and executed.
- Performed impact analysis for errors, deficiencies, and improvements found during manual and automation tests, created a Problem Report record via Jira, and reduced regression testing costs.

HAVELSAN 04.2021 - 02.2023

Senior Software & System / Test Engineer

MBSM Project is an information system developed using the product infrastructure named KOVAN (National Enterprise Resource Planning **(ERP) Product)** by HAVELSAN.
As a Senior Software & System / Test Engineer, I took part in **all stages of SDLC** in the MBSM web application project developed by applying **Microservice architecture** and Agile Methodology Scrum. **During the analysis and requirements determination phase**, according to the MIL- STD-408 software development standard and HVL-TEMP-SRS Havelsan document standard, I took part in the creation, **management, reporting, and validation** of the requirement set consisting of approximately **2500 softwarerequirements** for 5 Departments of the Ministry of National Defense. **During the design and development phases**, I took part in designing and developing the application to meet the defined requirements, writing unit tests, fixing bug records, and reviewing Pull Requests. **During the testing phase,** I took part in early detection of errors with the shift-left approach and reducing the cost of error correction/faulty development, planning the tests to be performed in the sprint, designing the test scenario with 100% coverage among 2500 requirement sets, creating the test procedure document, publishing the approved test procedures on Jira, running static/ dynamic, functional/non-functional tests, creating and tracking the records of the errors/ deficiencies/improvements found by performing impact analysis on Jira, presenting the status of the tests in status meetings, standardizing the error records to avoid creating duplicate/faulty records, and automating manual tests to reduce the cost of regression testing.

MINISTRY OF NATIONAL EDUCATION 09.2019 - 01.2021

Information Communication Technology Teacher and TUBITAK 4006 Project Manager

I worked as an Information and Technology Teacher and TUBITAK 4006 project manager. I implemented 26 projects in the field of information technologies. I ensured the establishment of the school library.
