FERHAT TUFEKCI

Computer Engineer who has worked in different roles such as software engineer, system engineer (business analyst, requirement engineering), and test engineer in a solution-oriented, collaborative manner in all steps of the Software Development Life Cycle (SDLC) since Anatolian Technical High School education.

Languages: Turkish (Native) | English (Graduated from Ankara University, which provides education in 100% English)
Personal Security Clearance: Valid until 12.04.2026
Military Service: Completed
Driving Licence: Classes M, B, B1, D1 (No traffic fines or accidents since 2015)
Contact: (+90 507 600 81 79) | ferhattufekci@outlook.com.tr | LinkedIn | GitHub | My Website | Medium

TECHNICAL SKILLS

- Writes easy-to-understand and easy-to-maintain code.
- Knows industry standards and tries to keep up with them.
- Procedural programming, object-oriented programming (OOP), multithreading programming, solid principles, design patterns, data structure, and searching sorting algorithms.
- Requirement Analysis and Management.
- Prepare documents such as SSS, SRS, STP, STD, STR within the scope of MIL-STD, STANAG standards, and HAVELSAN HVL-TEMP-SRS, MilSOFT document templates.
- Apply static and dynamic tests in automation and manual testing in an Agile environment.
- Agile methodology Scrum, Jira, Confluence, MS Project, Figma, Doors, Microsoft Office Programs.
- SVN, Git (Git Version Control System), GitHub, GitHub Actions, Bitbucket, Jenkins, SonarQube, Linux, Docker.
- HTML, CSS, JavaScript, Bootstrap.
- SQL, Transact-SQL (T-SQL), Microsoft SQL Server, PostgreSQL.
- C++, Python, Java, Swing, JavaFX, Spring Framework, Hibernate.
- Selenium, Postman, and Cucumber.

EDUCATION

Miuul 05.2023 - 11.2023

Data Science & Machine Learning Bootcamp Participant

It is an online-live and mentor-supported Data Scientist and Artificial Intelligence Engineer Training program.
In this program, I developed projects that solved more than 10 real-life problems and shared them on my GitHub account.

Gazi University 2022 - Present

M.Sc. Information System(in English)

Ankara University 2014 - 2019

B.E.N.G.Computer Engineer, GPA: 3.01 / 4.00

Since none of the courses I took in the computer programming department were not counted, my education period; English preparation (1 year) + 4 years (engineering education period).

Gazi University 2011 - 2013

F.D.Computer Programming, GPA: 3.25 / 4.00

Top Score of the Department

Ahmet Cicek Anatolian Technical High School 2007 - 2011

Web Technologies and Software, GPA: 79 / 100

Top Score of the Department

HOBBIES & INTERESTS

- Trekking, Online Computer Games (I play in a support position in Lol game.)
- I don't smoke. At the same time, I am a volunteer member of Yeşilay
- I am a Volunteer Member of the Disaster and Emergency Management Presidency (AFAD)
- I am a member of the Ankara Club Association, which was established with the directives of Mustafa Kemal ATATÜRK.

WORK EXPERIENCE

FREELANCE 06.2010 - 04.2021 & 05.2023 - Present

Full Stack Developer & Requirement Engineer & Agile Tester & Blogger

- With my requirements analysis and requirements management skills, I ensure the production of the right software that would solve people's problems.
- With my Test Engineering skills, I ensure the production of quality, useful software.
- With my coding skills, I develop the software according to the requirements. I also automate regression tests in manual tests, reducing testing effort and human errors.
- I share my experiences on my medium page. Almost all of my articles were published on pages followed by thousands of people with an approval process.

MilSOFT 02.2023 - 05.2023

Senior System & Test Engineer

MilSOFT is the only company in the Turkish Defense Industry to reach the CMMI-5 level with 100% coverage in all of its projects.
Mil-DLP (MilSOFT Multi Data Link Processor) is a system that provides multi-link processing capability to share tactical information among surface, subsurface, air, and land platforms/units.
As a Senior System & Test Engineer, I have taken tasks on the on Mil-DLP Product Line (integrated with **siper** & **hakim** projects of **aselsan company**) which was developed by applying Agile Methodology Scrum.

- Organizational memory was created with the information acquired during the orientation, and the contribution time of those who joined the project later was shortened.
- According to **NATO Requirements**, the Creation of test scenarios for NATO Tactical Data Link Systems such as Link 11, Link 16, Link 22, JREAP, and VMF.
- Manual and automation tests were performed.
- Planned and monitored testing activities in the Sprint.
- Test scenarios were written and executed.
- Performed impact analysis for errors, deficiencies, and improvements found during manual and automation tests, created a Problem Report record via Jira, and reduced regression testing costs.

HAVELSAN 04.2021 - 02.2023

Senior Software & System / Test Engineer

MBSM Project is an information system developed using the product infrastructure named KOVAN (National Enterprise Resource Planning **(ERP) Product)** by HAVELSAN.
As a Senior Software & System / Test Engineer, I have taken tasks at all steps in the SDLC of the MBSM project, which was developed by applying Agile Methodology Scrum with **Microservice Architecture**. **During the analysis and requirements determination phase**, according to the MIL- STD-408 software development standard and HVL-TEMP-SRS Havelsan document standard, I took part in the creation, **management, reporting, and validation** of the requirement set consisting of approximately **2500 software requirements** for 5 Departments of the Ministry of National Defense. **During the design and development phases**, I took part in designing and developing the application to meet the defined requirements, writing unit tests, fixing bug records, and reviewing Pull Requests. **During the testing phase,** I took part in early detection of errors with the shiftleft approach and reducing the cost of error correction/faulty development, planning the tests to be performed in the sprint, designing the test scenario with 100% coverage among 2500 requirement sets, creating the procedure document, publishing the approved test procedures on Jira, running static/ dynamic, functional/non-functional tests, creating and tracking the records of the errors/ deficiencies/improvements found by performing impact analysis on Jira, presenting the status of the tests in status meetings, standardizing the error records to avoid creating duplicate/faulty records, and automating manual tests to reduce the cost of regression testing.

MINISTRY OF NATIONAL EDUCATION 09.2019 - 01.2021

Information Communication Technology Teacher and TUBITAK 4006 Project Manager

I worked as an Information and Technology Teacher and TUBITAK 4006 project manager. I implemented 26 projects in the field of information technologies. I ensured the establishment of the school library.
