Ferhat TUFEKCI

Computer Engineer who has been working in different roles such as software engineer, system engineer (business analyst, requirement engineering), and test engineer in a solution-oriented, collaborative manner in all steps of SDLC since high school education.

Ankara, Turkey

(+90 507 600 81 79) | ferhattufekci@outlook.com.tr | LinkedIn | GitHub |My Website| Medium |Unity

Languages: Turkish (Native) | English (Graduated from Ankara University, which provides education in 100% English)
Personal Security Clearance : Valid until 12.04.2026
Military Service: Completed
Driving Licence : Classes M, B, B1, D1 (No traffic fines or accidents since 2015)

Summary

The opportunity to solve a common problem experienced by everyone with a computer in your room shaped my education and business life.

I have completed my high school, associate, and undergraduate education in computer science programs with outstanding grades.
Since my high school education, I have gained experience by working **in different roles** such as **software engineer, system engineer (business analyst),** and **test engineer** in a solution-oriented, collaborative manner **in all steps of the SDLC.** I have experience in many areas, from small-scale software to large-scale software, such as high availability, auto-scalable enterprise solutions, and web applications.
With my requirements analysis and requirements management skills, I ensure the production of the right software that would solve people's problems. **With my Test Engineering skills**, I ensure the production of quality, useful software. **With my coding skills**, I develop the software according to the requirements. I also automate regression tests in manual tests, reducing testing effort and human errors. I share my experiences on my medium page.
I am a supportive and enthusiastic team player dedicated to streamlining processes and efficiently resolving project issues. I have a high level of personal morals and integrity. I am goal- oriented, self-motivated, and committed to the successful outcome of the project. I am willing to work hard and have a great desire to learn.

Skills

- Understands abstraction in software.
- Writes easy-to-understand and easy-to-maintain code.
- Knows industry standards and tries to keep up with them.
- Knowledge of procedural programming, object-oriented. programming, multithreading programming, solid principles, design patterns, data structure, and searching and sorting algorithms.
- Knows Procedural Programming C and Object Oriented programming languages such as C++, C#, and Java and learns other programming languages from the same family in a short time.
- Knows SQL commands (data manipulation commands, database manipulation commands) and transacts SQL language developed for SQL server. Learns other SQL languages such as PostgreSQL, PLSQL, and database management systems in a short time.
- Knows HTML, CSS, JavaScript, Bootstrap, and PHP and learns other CSS and JavaScript libraries in a short time.
- Knows how to do Requirement Analysis and Management.
- Knows how to prepare documents such as SSS, SRS, STP, STD, STR within the scope of MIL-STD, STANAG standards, and HAVELSAN HVL-TEMP-SRS, MilSOFT document templates.
- Knows Microsoft Office Programs and Doors.
- Knows Agile methodology Scrum.
- Knows how to use Jira for problem tracking and Agile project management.
- Knows how to create/update corporate memory via Confluence.
- Knows Git version control system and manages Git repository with Bitbucket and GitHub.
- Knows CI/CD processes and DevOps tools such as Jenkins and SonarQube.
- Knows written test concepts and techniques at ISTQB Foundation Level syllabus V4.0.
- Knows how to apply static and dynamic tests in automation and manual testing in an Agile environment.
- Knows Testing Tools and frameworks such as Selenium, Postman, and Cucumber and learns other test frameworks in a short time.

Hobbies and Interests

- Trekking
- Online Computer Games (I play in a support position in Lol game.)
- I don't smoke. At the same time, I am a volunteer member of Yeşilay
- I am a Volunteer Member of the Disaster and Emergency Management Presidency (AFAD) to raise awareness about the reality of earthquakes, which should always be aware of, and to survive in possible earthquake situations, to sustain my life, and to bring light to those who are under the collapse (under the darkness).
- I am a member of the Ankara Club Association, which was established with the directives of Mustafa Kemal ATATÜRK and keeps the tradition of being a spy.

Work Experience

FREELANCE

Ankara, Turkey

Full Stack Developer & Requirement Engineer & Agile Tester & Blogger

05.2023 – Present

• With my requirements analysis and requirements management skills, I ensure the production of the right software that would solve people's problems.
• With my Test Engineering skills, I ensure the production of quality, useful software.
• With my coding skills, I develop the software according to the requirements. I also automate regression tests in manual tests, reducing testing effort and human errors.
• I share my experiences on my medium page. Almost all of my articles were published on pages followed by thousands of people with an approval process.

MIUUL

Ankara, Turkey

Data Science & Machine Learning Bootcamp Participant

05.2023 – 11.2023

It is an online-live and mentor-supported Data Scientist and Artificial Intelligence Engineer Training program. In this program, I developed projects that solved more than 10 real-life problems and shared them on my GitHub account.

MilSOFT

Ankara, Turkey

Senior System & Test Engineer

02.2023 – 05.2023

MilSOFT is the only company in the Turkish Defense Industry to reach the CMMI-5 level with 100% coverage in all of its projects.

Mil-DLP (MilSOFT MULTI DATA LINK PROCESSOR) PRODUCT LINE PROJECTS (INTEGRATED WITH SIPER & HAKIM PROJECTS OF ASELSAN COMPANY)

Mil-DLP (MilSOFT Multi Data Link Processor) is a system that provides multi-link processing capability to share tactical information among surface, subsurface, air, and land platforms/units.

As a Senior System & Test Engineer, I have taken tasks on the on Mil-DLP Product Line which was developed by applying Agile Methodology Scrum.

Responsibilities:

- Requirement Analysis and Management.
- According to NATO Requirements, the Creation of test scenarios for NATO Tactical Data Link Systems such as Link 11, Link 16, Link 22, JREAP, and VMF.
- Performing manual and automation tests.
- Including planning and tracking of test activities in Sprint.
- Writing test scenarios, and running tests.
- Creating and tracking the Problem Report record over Jira for errors, deficiencies, and improvements found during manual and automation testing.
- Creating/updating corporate memory via Confluence.

Used Techonologies: | Agile methodology Scrum for project management | Jira for issue, task tracking, and project management | Confluence for corporate memory | Jenkins for CI/CD | Doors for requirement management | STANAG standards for Reporting Requirements and Engineering Suggestions in accordance with military standards | SVN for document version control | Git for automation test case version control | Bitbucket for repo system | Specific software developed by Milsoft for Automation Test Case writing | Gateway to monitor data transmission |

HAVELSAN

Ankara, Turkey

Senior Software & System / Test Engineer

04.2021 – 02.2023

HAVELSAN is a Defense Industry Company (#99 on the 2020 top list of DefenseNews) mainly focused on large-scale software projects.

MINISTRY of NATIONAL DEFENSE (MSB) INFORMATION MODERNIZATION (MBSM) PROJECT

It is an information system developed using the product infrastructure named KOVAN (National Enterprise Resource Planning (ERP) Product) by HAVELSAN.

As a **Senior Software & System / Test Engineer**, I have **taken tasks** at **all steps** in the SDLC of the MBSM project, which was developed by applying Agile Methodology **Scrum** with **Microservice Architecture**. During the analysis and requirements determination phase, I was involved in the **creation and management of the requirement set**, consisting of **approximately 500 software requirements** for each **of the 5 Departments.** I also participated in **software development**, **testing**, and **leadership activities**.

Responsibilities:

- Determining the requirements of the software, analyzing and reporting which are According to MIL-STD-408 software development standard and HAVELSAN document template standard HVL-TEMP-SRS.
- Reporting Engineering Change Requests (Reporting customer requests, which should be qualified as Contract Amendment Proposal, as 'SDÖ').
- Developing the application according to the identified requirements.
- Planning the test based on the defined requirements, designing the test case, and creating the test procedure document.
- Release of approved Test procedures on Jira.
- Performing static and dynamic tests in an Agile environment.
- Creating and tracking the NCR record over Jira for errors, deficiencies, and improvements found during static and dynamic testing.
- Solving NCRs that are in proposed status on Jira.
- Following up the CD 'Continuous Delivery' process with Jenkins.
- Performing regression testing and updating the status of the error record (NCR).
- When an intermediate product is available to the user, explain the use of the program to the user.
- Preparation of the User Manual of the Modules that have been accepted provisionally/conditionally.
- Creating/updating corporate memory via Confluence.

Used Techonologies: | Agile methodology Scrum | Jira | Confluence for corporate memory | MIL-STD-408 and HVL-TEMP-SRS standards for Reporting Requirements and Engineering Suggestions in accordance with military standards | Jenkins for CI/CD | SVN | Git | Bitbucket for repo system | Java and Spring Framework for software development | JavaServer Face (JSF) | PrimeFaces for JSF | Hibernate | Docker | IntelliJ IDEA for debugging

MINISTRY OF NATIONAL EDUCATION

Ankara, Turkey

Information Communication Technology Teacher and TUBITAK 4006 Project Manager

09.2019 - 01.2021

4006–TUBITAK SCIENCE FAIR PROJECTS

Children starting coding education at an early age; show more development in mental development, problem-solving skills, planning of work, establishing relationships between situations, and generating new ideas.

With 4006-TUBITAK Science Fair Projects, the mental development of Vehbi Dincerler Secondary School students makes them more successful in coding in the years ahead. Considering that secondary school students will be more beneficial individuals in the state of the Republic of Turkey with these known benefits, I worked as an **IT and Technology Teacher** and **TUBITAK 4006 project manager** until my job applications for defense industry companies were concluded.

Used Techonologies: | WordPress, HTML, CSS, and JavaScript for media literacy project | Arduino and sensors for robotics-related projects |

HYD MAKINA IND.TRADE.CO.LTD

Ankara, Turkey

Freelance Software Developer

01.2013 – 08.2013

As a freelance software developer, I took part in the development of Hyd Makina's website.

Responsibilities:

- Reporting of Requirements.
- Developing the application according to the identified requirements.
- HTML / CSS codes were written for the design given as PSD files.
- Performing tests.
- Perform validation operations.

Education

Gazi University

Ankara, Turkey

M.SSc. Information System(in English)

2022 – Present

✓ Blockchain

Ankara University

Ankara, Turkey

B.E.N.G. Computer Engineering(in %100 English), GPA: 3.01 / 4.00

2014 - 2019

Since none of the courses I took in the computer programming department were not counted, my education period; English preparation (1 year) + 4 years (engineering education period).

✓ 100 % English Education
✓ Programming Languages Concepts
✓ Object Oriented Design
✓ Data Structures
✓ Design Patterns
✓ Parallel Programming
✓ Agile Software Development | CI / CD | Jira | Confluence | Jenkins | Docker | Maven
✓ Embedded Programming
✓ Hardware Description Language (VHDL)
✓ Relational Databases
✓ Data Mining
✓ MSSQL Server
✓ C++
✓ Core Java
✓ Java Swing
✓ Hibernate

Gazi University

Ankara, Turkey

F.D.Computer Programming, GPA: 3.25 / 4.00

2011 - 2013

✓ Top Score of the Faculty
✓ Requirement Analysis
✓ Requirement Management
✓ System Design
✓ Doors
✓ UML
✓ Software Testing
✓ Software Development
✓ Adobe Products (Photoshop, Illustrator)

Yenikent Ahmet Cicek Anatolian Technical High School

Ankara, Turkey

Web Technologies and Software, GPA: 79 / 100

2007 - 2011

✓ Top Score of the Department
✓ Html | CSS | JavaScript | Bootstrap
✓ Web Development
✓ Object Oriented Programming (OOP)
✓ SOLID Principle
✓ C#
✓ SQL
✓ Git Version Control System
✓ GitHub Repo System
✓ asp.net MVC
✓ Windows Presentation Foundation (WPF)
✓ CATIA
✓ AutoCad 2D
